Never Events

Policy Admin-014

Origination Date: 9/25/19
Reviewed/Revised: 9/25/19
Next Review Date: 9/25/20
Current Effective Date: 9/25/19

Disclaimer:
1. Policies are subject to change without notice.
2. Policies outline coverage determinations for U of U Health Plans Commercial, and Healthy U (Medicaid) plans. Refer to the “Policy” section for more information.

Description:
Hospital Acquired Condition (HAC) are conditions not present when a patient is admitted or arrives at the hospital or other facility, but occurs during or after the stay. HACs include conditions such as decubitus ulcers, urinary tract infections due to urinary catheters, pneumonia, etc. as the list of HACs published and updated by the Center for Medicare and Medicaid Studies (CMS) in Inpatient Prospective Payment System Final Rule. The HAC’s include iatrogenic complications cause by providers or other health care personnel including but not limited air embolism, blood incompatibility, misplaced instruments, wrong side surgery or other such events, and serious reportable events (SRE). SRE’s are also known as “Never Events”. These are events considered preventable and usually result in serious harm to the patient.

University of Utah Health Plans reviews claims for Hospital Acquired Conditions, Never Events, and iatrogenic Complications. This policy outlines the review process and coverage for these conditions.

Policy Statement and Criteria

1. Commercial Plans

University of Utah Health Plans does NOT cover direct costs associated with Hospital Acquired Conditions (as defined by CMS), Never Events or Iatrogenic Complications.

Those direct costs identified to be related to hospital acquired conditions, never events or iatrogenic complications will be removed from any DRG or other payments due to providers with appropriate recalculation of payment for otherwise identified medically necessary covered services based on these considerations.
2. Medicaid Plans

Coverage is determined by the State of Utah Medicaid program; if Utah State Medicaid has no published coverage position and InterQual criteria are not available, the U of U Health Plans Commercial criteria will apply. For the most up-to-date Medicaid policies and coverage, please visit their website at http://health.utah.gov/medicaid/manuals/directory.php or the Utah Medicaid code Look-Up tool.

Clinical Rationale

The term "Never Event" was first introduced in 2001 by Ken Kizer, MD, former CEO of the National Quality Forum (NQF), in reference to particularly shocking medical errors—such as wrong-site surgery—that should never occur. Over time, the term's use has expanded to signify adverse events that are unambiguous (clearly identifiable and measurable), serious (resulting in death or significant disability), and usually preventable. Since the initial never event list was developed in 2002, it has been revised multiple times, and now consists of 29 "serious reportable events" grouped into 7 categories:

- Surgical or procedural events
- Product or device events
- Patient protection events
- Care management events
- Environmental events
- Radiologic events
- Criminal events

Most Never Events are very rare. For example, a 2006 study estimated that a typical hospital might experience a case of wrong-site surgery once every 5 to 10 years. However, when Never Events occur, they are devastating to patients—71% of events reported to the Joint Commission over the past 12 years were fatal—and may indicate a fundamental safety problem within an organization. Although individual events are uncommon, on a population basis, many patients still experience these serious errors. A 2013 study estimated that more than 4000 surgical never events occur yearly in the United States.

The Joint Commission has recommended that hospitals report "sentinel events" since 1995. Sentinel events are defined as "an unexpected occurrence involving death or serious physiological or psychological injury, or the risk thereof." The NQF's Never Events are also considered sentinel events by the Joint Commission. The Joint Commission mandates performance of a root cause analysis after a sentinel event. The Leapfrog Group recommends that in addition to an RCA, organizations should disclose the error and apologize to the patient, report the event, and waive all costs associated with the event.

Because Never Events are devastating and preventable, health care organizations are under increasing pressure to eliminate them completely. The Centers for Medicare and Medicaid Services (CMS) announced in August 2007 that Medicare would no longer pay for additional costs associated with many preventable errors, including those considered Never Events. Since then, many states and private insurers have adopted similar policies. Since February 2009, CMS has not paid for any costs associated with wrong-site surgeries.

Never Events are also being publicly reported, with the goal of increasing accountability and improving the quality of care. Since the NQF disseminated its original Never Events list in 2002, 11 states have mandated reporting of these incidents whenever they occur, and an additional 16 states mandate
The most recently available list of Never Events are listed in the following table:

<table>
<thead>
<tr>
<th>National Quality Forum List of Serious Reportable Events, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Surgical events</strong></td>
</tr>
<tr>
<td>• Surgery or other invasive procedure performed on the wrong body part</td>
</tr>
<tr>
<td>• Surgery or other invasive procedure performed on the wrong patient</td>
</tr>
<tr>
<td>• Wrong surgical or other invasive procedure performed on a patient</td>
</tr>
<tr>
<td>• Unintended retention of a foreign object in a patient after surgery or other procedure</td>
</tr>
<tr>
<td>• Intraoperative or immediately postoperative/post-procedure death in an American Society of Anesthesiologists Class I patient</td>
</tr>
<tr>
<td><strong>Product or device events</strong></td>
</tr>
<tr>
<td>• Patient death or serious injury associated with the use of contaminated drugs, devices, or biologics provided by the health care setting</td>
</tr>
<tr>
<td>• Patient death or serious injury associated with the use or function of a device in patient care, in which the device is used for functions other than as intended</td>
</tr>
<tr>
<td>• Patient death or serious injury associated with intravascular air embolism that occurs while being cared for in a health care setting</td>
</tr>
<tr>
<td><strong>Patient protection events</strong></td>
</tr>
<tr>
<td>• Discharge or release of a patient/resident of any age, who is unable to make decisions, to other than an authorized person</td>
</tr>
<tr>
<td>• Patient death or serious disability associated with patient elopement (disappearance)</td>
</tr>
<tr>
<td>• Patient suicide, attempted suicide, or self-harm resulting in serious disability, while being cared for in a health care facility</td>
</tr>
<tr>
<td><strong>Care management events</strong></td>
</tr>
<tr>
<td>• Patient death or serious injury associated with a medication error (e.g., errors involving the wrong drug, wrong dose, wrong patient, wrong time, wrong rate, wrong preparation, or wrong route of administration)</td>
</tr>
<tr>
<td>• Patient death or serious injury associated with unsafe administration of blood products</td>
</tr>
<tr>
<td>• Maternal death or serious injury associated with labor or delivery in a low-risk pregnancy while being cared for in a health care setting</td>
</tr>
<tr>
<td>• Death or serious injury of a neonate associated with labor or delivery in a low-risk pregnancy</td>
</tr>
<tr>
<td>• Artificial insemination with the wrong donor sperm or wrong egg</td>
</tr>
</tbody>
</table>
- Patient death or serious injury associated with a fall while being cared for in a health care setting
- Any stage 3, stage 4, or unstageable pressure ulcers acquired after admission/presentation to a health care facility
- Patient death or serious disability resulting from the irretrievable loss of an irreplaceable biological specimen
- Patient death or serious injury resulting from failure to follow up or communicate laboratory, pathology, or radiology test results

**Environmental events**

- Patient or staff death or serious disability associated with an electric shock in the course of a patient care process in a health care setting
- Any incident in which a line designated for oxygen or other gas to be delivered to a patient contains no gas, the wrong gas, or is contaminated by toxic substances
- Patient or staff death or serious injury associated with a burn incurred from any source in the course of a patient care process in a health care setting
- Patient death or serious injury associated with the use of restraints or bedrails while being cared for in a health care setting

**Radiologic events**

- Death or serious injury of a patient or staff associated with introduction of a metallic object into the MRI area

**Criminal events**

- Any instance of care ordered by or provided by someone impersonating a physician, nurse, pharmacist, or other licensed health care provider
- Abduction of a patient/resident of any age
- Sexual abuse/assault on a patient within or on the grounds of a health care setting
- Death or significant injury of a patient or staff member resulting from a physical assault (i.e., battery) that occurs within or on the grounds of a health care setting

**Applicable Coding**

**CPT Codes**

Too many codes to list.

**HCPCS Codes**

Too many codes to list.

Disclaimer:
This document is for informational purposes only and should not be relied on in the diagnosis and care of individual patients. Medical and Coding/Reimbursement policies do not constitute medical advice, plan preauthorization, certification, an explanation of benefits, or a contract. Members should consult with appropriate health care providers to obtain needed medical advice, care, and treatment. Benefits and eligibility are determined before medical guidelines and payment guidelines are applied. Benefits are determined by the member’s individual benefit plan that is in effect at the time services are rendered.

The codes for treatments and procedures applicable to this policy are included for informational purposes. Inclusion or exclusion of a procedure, diagnosis or device code(s) does not constitute or imply member coverage or provider reimbursement policy. Please refer to the member’s contract benefits in effect at the time of service to determine coverage or non-coverage of these services as it applies to an individual member.
