---

**This pharmacy benefit applies to Hospitals & Clinics employees and their dependents.**

For more information on this benefit, as well as benefits when using non-U pharmacies and providers, please refer to your Summary Plan Document.

To search for other pharmacies please visit our website, [uhealthplan.utah.edu](http://uhealthplan.utah.edu).
Pharmacy coverage will be managed through University of Utah Health Plans and administered through NPS (regardless of which medical offering you select). This means:

- All pharmacy coverage is included with your elected medical plan. You do not need to elect a separate pharmacy plan during open enrollment.
- Claims and questions should be directed to NPS. NPS is available 24 hours/7 days a week for customer support at 1(877) 895-7163.
- You may still use non-University of Utah Health Care pharmacies (like Walgreens), but you save money when you use University of Utah Health Care locations.
- You can save even more when you use both a University of Utah Health Care provider and pharmacy.

How does the pharmacy plan work?

The pharmacy plan offers you varying levels of coverage based on types of drugs required (generic, preferred brand, non-preferred brand, or specialty) AND where your prescription is filled.

- Copay coverage: For generic and preferred brand drugs, you will pay a copay for the prescription. (Copays do not count toward the pharmacy plans out-of-pocket maximum.)
- Coinsurance coverage: For non-preferred brand and specialty medications, you will pay 20% (or 30% at a non-UUHC pharmacy) for your prescription. (Coinsurance payments are counted toward the pharmacy plans out-of-pocket maximum.)
- Through UUHC mail-order you pay only two copays for a 90-day (three-month) supply of medication. Contact (801)213-4550 to get started.
- Through all UUHC pharmacies you pay only two copays for a 90-day (three-month) supply of medication.
