

## Changes to the University of Utah Health Plans Formularies

University of Utah Health Plan Exchange may add or remove drugs from the formulary during the year. If a drug is scheduled to be removed from the formulary, you will be notified at least 60 days before the change becomes effective. In cases where the U.S. Food and Drug Administration (FDA) deems a drug unsafe, or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from the formulary and notify you afterward.

PA=Prior Authorization is required, QL= Quantity Limit, ST= Step Therapy
